

GameAnarchy Battlefield 2 Hack Reference Guide

At first I would like to say BIG THANKS to Great Programmer of GameAnarchy Community Drunken Cheetah. His BF2 ULTRA HACK is really pretty good and THE BEST IN THE WORLD !!!

GENERAL INFORMATION

1. PunkBuster Status: U N D E T E C T E D !!!

2. This BF2 Ultra Hack is **XP/Vista compatible**. There are no problems to use this Hack in XP, but if you want to use it under Vista, you will HAVE TO DISABLE UAC (User Account Control)very important !!! Else you will most likely get detected.

3. **Name and PID spoofer !!!** This cool function allows you to play with somebody Account Name or play with your own account, but with other name.

To enable this function press button "Settings" before streaming hack. Turn On checkbox "Spoof name and Player ID", enter your preferred Name and Player ID. Then you able to begin Stream hack and Start the game.

Important: If you enable this function, YOU MUST LOGIN TO AN ONLINE ACCOUNT ! Don't enable it if you use a single player account, the hack will not work !

When you spoof a PID, all stats will goto that PID...but you will have access to that players rank and weapon unlocks !!!

Very important: using the spoofer will not protect you from kicks or bans, because bans are by CD-KEY, not by name or PID. But making your name something hard to type may stop the admins who just do a !b and !k commands. Some ideas...unprintable names, or copy someone player name in the server at this moment.

4. **ScreenShot Cleaner Included.** To enable the ScreenShot Cleaner press button "Settings" before streaming hack and turn On checkbox " ScreenShot Cleaner".

If you use Win98 compatibility mode - don't forget to remove that.

Important: You may have "blurred" screenshots if you have "Remove Post Production" enabled...don't use this feature for the "cleanest shots possible"!

HACK MENU

SETTINGS

1. AIMBOT SETTINGS.

Visual only - This forces the aimbot to lock onto target that is visible for you (not behind thick walls) and can be shot. Other enemies, which stay at this moment behind thick walls – will be ignored by aimbot lock into them.

Penetrate - This is additional feature to **Visual only**, which will allow to aim through items like thin walls, chain link fences etc...anything you can shoot through and hit the target.

Headshot only - Forces the aimbot to aim at the head bone only (ideal for snipers).

Off after lock - Stops you from locking onto another enemy after the current target is dead until you repress your aimbot key.

Display aim – This will give you a Circle on your current aim, which will be killed at first using Aimbot. It will flash when the target can be shot.

Sprint aim - Allows you to aim while enemy is running.

No Spread - Disables bullet spread of all weapons. This function compensate the recoil of weapons and gives you some aim/bullet prediction moves your aim.

Important: this function causes the screen to shake a little, but that normal !

Aimbot Closest - This will always target the closest player (unless they are on the ShitList). They must die first !!!

Lead adjust - this slider allow you to regulate the distance ahead of the running target you will shoot. Ideal for moving targets, who are moving parallel to yourself.

Important: there is no ideal score for this adjusting. It's individual for everyone. You must set it based on your own test results. And score of this feature is depending on server ping.

Drop adjust - the same as **Lead adjust**, but
Lead Adjust = Horizontal Lead (left/right) for speed
Drop Adjust = Vertical Lead (up/down) for distance

TV missile lead - Same as **Lead adjust**, but for the TV missile of Helicopter. Also no ideal score for this adjusting. Also individual for everyone.

Distance - The distance to what the aimbot will lock on.

Auto Fire (Smart Shots) - This will only fire rounds if the spread is under a certain value controlled by the slider. Autofire is working only with main weapon, except Sniper.

Important: Smart Shots only works if you have No Spread selected !

2. MISC SETTINGS.

2D Circle radar - A great visual on where the Enemy is located by 360 degrees.

Enemy Warning - This will display a yellow triangle when a Enemy is close to you (the distance can be adjusted with the slider).

Digital zoom - This places a ultra zoom at the bottom of your HUD (ideal for snipers).

Mini-Map - This feature allow to see all enemies on MiniMap.

3. COMMANDER SETTINGS.

Friendly / Enemy - By clicking you "Resign" button you will resign either the enemy or friendly commander. Checking the box "Auto" will stop anyone from being a commander on that team.

Force – Checking this box will give you all the commander functions. (You can not join a squad when this is on).

Unlimited - This allows you to drop unlimited Supplies, Arty, and Vehicles.

4. REMOVE SETTINGS.

Smoke - removes Smoke. Not recommended to use, because if it ON – you cant see useful visuals, such as Artillery firing, Helicopter rockets path etc..

Fog - removes Fog. Pretty good feature, which allow you to see enemies at far distance.

Post Production - (unknown)

Trees - removes Trees.

Grass - removes Grass.

Roads - removes Roads.

Sky - removes Sky.

Draw Distance - allow to see landscape in more far distance.

Terrain - removes Terrain.

GameTags - removes regular gametags you see when you aiming at a particular player.

HUD – removes all inscriptions on the screen, Minimap etc.. It makes screen clean.

Sun Flare – removes annoying sun light from some maps where the sun is in your eyes

VISUALS

1. ESP

Player Names – Shows you friendly/enemy names. You can choose color of it.

Distance – Shows you distance before players.

Outline – Cool feature, which allow to makes it easier to read players names.

Important: Only use this if you have a fast system. It will draw each name 4 more times to create the outline !!!

Stacked – You can read player names, everyones ESP without it overlapping.

Health Bars – Shows you friendly/enemy health bars.

Class Icons – Shows you what class a player is.

Smart Icons – Not worked yet. Coming soon.

Slider for ESP is regulate the working distance of these features (player names, health bars, class icons)

Draw Skeleton – Shows you friendly/enemy skeletons, which you can see through the walls. You can choose color of it. Slider is regulate the working distance of showing skeletons.

Impact – This add some additional lines. I don't know why its needed.

Cross Hair – Allow you to set additional constant CrossHair in the center of your screen. You can choose your favorite crosshair by moving slider

Player Charms – Allow you to see players through the walls. This is nearly as Draw Skeleton, but this shows you the whole body of player (not just skeleton).

Vehicle Charms – Allow you to see vehicles through the walls.

Misc Charms – It paints friendly/enemy claymores, C4, Mines into red color and you can see it through the walls. Also this feature includes No Scope feature (when you press right mouse button you can't see your own weapon).

Player Marks – Shows you:

Position Marks – position of friendly/enemy Players

Squad Leaders Marks – position of friendly/enemy Squad Leaders.

Vehicle Marks – position of friendly/enemy Vehicles

Slider is regulate the working distance of these features

Bounding Box – This draw square box around the friendly/enemy player. Slider is regulate the working distance of this feature.

PLAYER LISTS

Shit List – This will allows aimbot to target players checked before anyone else...even on same team! It is useful, if some stupid teamkiller present in your team.

Friend List – This will allows aimbot NEVER target players checked. Good for playing with your friend, which on the other team.

WINAMP

You must load Winamp with your own playlist before starting the game. Then (after game load) you can operate Winamp functions (play, stop, pause, track backward, track forward) using existing in Hack buttons. Slider is regulate the volume of playing music.

KEYS

Master – This hotkey turn ON/OFF Ultra Hack.

Clock – Turn On/Off internal clock in game.

SOME FREQUENTLY ASKED QUESTIONS

- Q: What is it Battlefield 2 ???
A: Fuck you. :)
- Q: How to navigate in Hack Menu ???
A: Press HotKey that shows you Hack Menu. Usually on default it's a DELETE button. Then you must find appeared on your screen **another** little mouse cursor. So, use this cursor to navigate in Hack Menu.
- Q: Loader is not loading. Writes: "HW mismatch Error". How can I fix it ?
A: You will need to install the vcredist file. http://rapidshare.com/files/112464298/vcredist_x86.rar
- Q: I have bought new computer (new motherboard, processor, video card etc). So I need to reset my HWID. How can I do it ?
A: Go to Ventrilo (brick.theultimatehack.com:4052), find admins (Brick or Gamer113). They can help you. Price of HWID Reset Operation is 10\$.
- Q: How to disable UAC in Vista ???
A: <http://www.howtogeek.com/howto/windows-vista/disable-user-account-control-uac-the-easy-way-on-windows-vista/>
- Q: When I try to start loader – Fatal Error Window popup with inscription "Failed to Download Version Info". Why can it be ?
A: Check, if your internet connection established ?
- Q: Sometimes, after streaming hack and starting the game – Hack is not activate in memory. What can I do ?
A: Try to do the next: press button "Settings" before streaming hack and just increase a little position of "Injection Delay" slider.
- Q: What optimal settings for **Lead adjust** or **TV missile adjust** slider ???
A: There are no ideal scores for these adjustments. It's individual for everyone. You must set it based on your own test results. And score of these features are depending on server ping.
- Q: When I press right mouse button (for best weapon aiming) I can't see my own weapon. What is it ? Bug ?
A: NO! This is a special feature "No Scope". If you don't like it – just disable "**Misc Charms**".
- Q: After I set "Force" in commander settings I cant drop artillery and UAV. Why ?
A: I don't know why, but its cures using next way: at first you must resign existing commander, at second you must become a real commander, then you must resign from commander position yourself and again check box "Force". Then you will able to drop UAV and unlimited artillery.
- Q: How to change cd-key without reinstall the game ?
A: There are allot of ways to change your cd-key, I show the most quick method.
- Convert your cd-key into the next: "x9392#####" (remove dashes, without spaces). For example: if cd-key is 55B3-X5K4-QYBG-CSGE-WQF3 - it must be converted into x939255B3X5K4QYBGCSGEWQF3
- Start registry editor (command "regedit")
- Find branch [HKEY_LOCAL_MACHINE\SOFTWARE\Electronic Arts\EA Games\Battlefield 2\ergc]
- Insert here(in "ergc" value) this string.
